

Fixedstats Quick Reference

Daily operating guide for numbers, accountability, onboarding, training, and SOP clarity.

OPERATING STANDARD

Use Fixedstats to enter numbers, read performance, coach accountability, and keep employees ready by role.

1 Enter Numbers

- Daily service inputs
- Parts and collision
- Missing entry checks

2 Performance

- Advisor scorecards
- Store dashboards
- Service roster and capacity

3 Accountability

- Daily Pulse risks
- Follow-up visibility
- Coaching opportunities

4 People Readiness

- Role onboarding
- Training completion
- SOP and go-live approval

RUN THE DAY

Daily Manager Rhythm

- Morning: review yesterday's numbers, missing entries, dashboard movement, and capacity concerns.
- Midday: check Daily Pulse risks, customer updates, MPIs, parts delays, and stalled ROs.
- End of day: confirm entries, capture open risks, and make notes for tomorrow's huddle.
- Weekly: review scorecards, below-line patterns, onboarding status, and SOP-based coaching needs.

BEFORE GO-LIVE

Onboarding + Training Gate

- Assign the onboarding path for the employee's actual position.
- Training app owns lessons, quizzes, completion, and pass/fail.
- Fixedstats owns status, manager observation, go-live approval, and commission or production release.
- Optional cross-training does not block go-live unless leadership makes it required.

ROLE GUIDE

Who Uses What

Advisors

Advisor Scorecard, Accountability, Onboarding, Training, SOPs

Technicians

Service Roster, Accountability, Onboarding, Training, SOPs

Managers

Enter Numbers, Performance, Accountability, People Readiness

VP Fixed Operations

Performance, Accountability, People Readiness

Best path

Position > SOPs > Training app > manager observation > go-live approval.

MANAGER STANDARD

Use It Well

Do

- Use numbers to identify the next action.
- Use accountability for coaching, not punishment.
- Use SOPs to coach the process, not the personality.
- Keep onboarding role-based and simple.

Avoid

- Random training paths that do not match the position.
- Duplicating printable checklists already handled in Fixedstats accountability tools.
- Tracking activity without deciding who owns the next step.

Quick test

If it does not help someone know what to do next, simplify it.
